English – Fluent

Mandarin – Native

Malay – Basic

About Me

I'm a Cybersecurity student at Asia Pacific University with hands-on experience in networking, programming, and security tools. I bring strong problem-solving, teamwork, and time-management skills. I consistently deliver work on schedule and seek an internship to apply my technical expertise in building secure, scalable solutions.

WORK EXPERIENCE

May 2024 – June 2024

HP PPS Asia Pacific Pte Ltd

Logistic Management Assistant

- Managed inventory and organized storage areas to ensure efficient logistics operations.
- Reported and tracked computer stock levels, improving accuracy in documentation.
- Strengthened organizational and reporting skills while working in a fast-paced environment.

Projects

- FoodiePoint Management System: Enabled efficient order handling and billing through a C# OOP-based restaurant system, improving organization and maintainability.
- APU Medical Centre: Improved clinic workflow with a Java GUI system supporting scheduling, payments, and secure role-based access.
- Linux Network Administration: Improved branch communication and security by optimizing network efficiency, ensuring reliable connectivity, and mitigating LAN attacks.
- Cisco Branch Routing: Enhanced branch network efficiency and resilience with VLANs, DHCP, OSPF, WLAN, EtherChannel, HSRP, and Layer 2
- Flight Reservation System (C++) – Optimized passenger handling with array and linked list components for booking, cancellation, and seat lookup.
- Web-Based Learning System – Supported digital learning by providing user registration, activity management, and admin control, improving workflow, and content organization using structured HTML design.
